What's New In AutoCAD?

Drafting and Parametric Blocks: Plan your next project with dynamic block libraries. Navigate through your design space using parametric blocks and define details for individual components. Smart Repetitions: Find more repeating features in your designs, even if they're nested or scaled. We added a new flag to the repeat command: "Ignore Non-Contiguous Scaling". This allows you to define repeating features for arbitrarily scaled designs. Edit Drawing and View Options in Tool Palettes: Make changes to the properties of drawings with the drop-down menus on tool palettes. Now you can make changes to the properties of drawings with the drop-down menus on tool palettes. And a few other items: The 2D annotation tools have been updated for a more natural use experience. You can now download the latest AutoCAD EPS, PDF, PIC, and PSD formats to your local drive. The MessageBox command line has been updated. A new tab in the Structure Editing toolbar allows you to choose between editing the Front or the Back of your drawing. Structure Editing: A new command-line tool for editing the front or back of a drawing is now available in Structure Editing: Get more from your tablet with IntelliMouse Premium. IntelliMouse for Windows is designed to provide the best experience on Windows 10 and is available for free. Customization: You can now change the background color of the floating frame for your inserted images. When you insert images to the clipboard, the floating frame of the inserted images will now default to the same color as your drawing area. You can now specify the width of the "ruler" line in the scale bar. You can now create new color themes with a check box. You can now choose to show or hide the color swatch for shape styles. When creating new styles in the Styles palette, you can now choose whether you want to see the selected and created styles. Style Export: You can now export custom styles and make them available for further editing. You can now choose the creation method for shape styles. You can now create new predefined palettes in the Palettes palette. When you define the new default color, you can now choose whether you want to have the default color
