I've tried to do the same in background page but 1G memory consumed by an app. Is it allowed to consume 1G memory in an app? Or only in a tab? Is there any other way to draw images in a canvas with chrome extension? I'm using following code to build a page: chrome.windows.create({ type: 'popup', url: "./templates/blank.html" }, { show: false }); 3e33713323
