What's New in the Secure Anonymous Surfing?

- Anonymous proxy & VPN - IP replacement. - Unlock the Internet. - Stop IP address blocking. - Internet Connectivity. - Privacy & Security. - Data encryption. - Anti-malware application. - Browser configuration. A convenient utility for quick removal of unwanted programs running on the computer.

With this app you will be able to check which applications are running on your computer and disable them. Besides, you will be able to see which other programs you have installed and which information is collected about you. A handy application for data backup and archiving. The application allows you to back up your files to a secure server and optionally to encrypt them. After that you will be able to restore and view your data from any device by connecting it to a secured FTP server. An excellent and extremely practical app that will help you organize your desktop PC and improve your overall experience. You will get a clean and clutter-free PC, packed with useful tools. The app comes with a customizable toolbar and a unique windows explorer extension. A powerful and handy app that allows you to monitor all your computer activities by listening your keystrokes, mouse movements, and screen changes. You will also be able to monitor all the documents you open and any kind of data you type into your browser. Our new and innovative application has been designed to provide you with additional features you haven't experienced before. You can read the articles you are interested in and watch the videos you want, all using a convenient "read later" feature. An easy-to-use application that allows you to manage your Internet connection on a connected computer or smartphone. To set it up, you need to create an account and

choose a network connection from the drop-down menu. Then all you need to do is to connect your device to the computer and you will be able to access the internet through its browser. The solution to everything! - Unlock the Internet. - Access blocked content and websites. - VPN tunneling. - Anonymity in web surfing. - A convenient way of using the Internet. - Anti-malware and data encryption. - Dozens of features. A great program to keep your computer safe and secure. It includes an extensive scanner of your files, tracks malicious files and removes them from your computer, allows you to encrypt the files and folders of your computer and remotely transfer the data to an external hard drive. A handy application to create a virtual hard drive. The application will create an on-line backup of your data and store it in the cloud. Once you get the virtual hard drive, you can install it on any computer. Furthermore, it allows you to create a virtual hard drive from a Windows CD/DVD. An amazing tool for rapidly optimizing

System Requirements:
