AutoCAD

In 1991 Autodesk introduced a "True Type Modeling" feature for AutoCAD that allowed users to build 3D models without the need for specialized 3D modeling software. This feature has allowed a broad adoption of the software, with more than 60 million users worldwide. Many students and hobbyists have also created 3D models using AutoCAD. The AutoCAD source code is written in C++ and OpenGL with a native 16-bit file format for compatibility with all AutoCAD versions. AutoCAD is integrated with other Autodesk products and services, and many add-on products are also available, including AutoCAD Annotation products, AutoCAD Modeling products, and AutoCAD Civil 3D products. History AutoCAD began as MicroCAD, a software application for microcomputers from 1982 to 1986. The name was changed to AutoCAD in 1986. The first model available for AutoCAD was the BMW Z1, which was released in 1988. In

1990, AutoCAD 2.0 was released. The current version of AutoCAD is AutoCAD LT, which was released in December 2002. On April 20, 2011, a high-profile court case began in San Francisco that challenged whether AutoCAD LT and its source code were property of the plaintiff, AutoDesk. In January 2012, a jury ruled in favor of Autodesk, and the defendant, Harcourt, was ordered to pay Autodesk US$75 million. The latest version of AutoCAD is AutoCAD LT 2014. Technology and features AutoCAD LT runs on Microsoft Windows and Mac OS X. It runs on ARM-based tablets and smartphones. AutoCAD LT and other AutoCAD programs run on desktops, laptops, and mobile devices with multi-touch screens, such as the iPad, Windows 8 tablets, and Android devices. AutoCAD can also be accessed via web browsers, with the ability to design drawings and collaborate with other users on the web. In November 2011, Autodesk introduced AutoCAD LT for Apple's iPhone and iPod Touch. As of version 2014, AutoCAD LT runs on tablets. It is available as a free, ad-supported app or as a paid, subscription-based app for $14.99 a month. AutoCAD LT for iPad is a commercial app

A number of third-party products were written to connect CAD applications to other business software systems. The EnvisionTec iCAM or ETAV for example integrates the cameras and laser scanners to digitize the structure, the content of construction sites. Services Autodesk Service and Support, formerly known as Autodesk Technical Support, is the company's global support

organization for Autodesk software products. Autodesk also offers Autodesk LiveU, a live service that offers real-time Autodesk-related e-learning courses, live webinars, self-service, tutorials, and a Knowledge Base with product support. The service is available via Autodesk Exchange, Autodesk Labs, Autodesk University, Autodesk School, and other Autodesk Digital Editions sites. Application fields Autodesk applications are used in many fields, from industry to academia, from engineering and construction to graphic arts, 3D visualization and animation, product design, documentation and even human–computer interaction. In engineering, Autodesk applications are used for 2D and 3D design, modeling and fabrication, and documentation and analysis. Within the engineering industries, Autodesk products are used in architecture, civil engineering, industrial design, mechanical engineering, mining, and other specialized fields. A large percentage of Autodesk's business comes from the oil and gas industry, the power and utility industry, and utilities. The application of Autodesk products in the building design industry is noted for using 3D modeling as a method for BIM (Building information modeling) in architecture. Q: Laravel MySQL Queries using Multiple WHERE clauses on a Single Column I am trying to write a MySQL query that uses multiple where clauses on a single column. The query is as follows: $test = \DB::table('test')->select('name')->where('dept_id', '=', \Auth::user()->dept->id)->get(); $test = \DB::table('test')->select('name')->where('dept_id', '=', \Auth::user()->dept->id)->where('id', '=', 1)->get(); When running the query I get the following error: Call to undefined method Illuminate\Database\Query\Builder::get() This query works fine if I write it like this: $test = \DB::table('test')->select('name')->where('dept_id', '=', \Auth::user()->dept->id)->where('id', '=', 1)->get(); I am confused as to why I am getting an error. Any help would be appreciated. A: The where clause is used to select the records, which are returned after the where clause. $test = \DB::table('test') ->select('name') ->where('dept_id', '=', \Auth::user()->dept->id) ->where('id', '=', 1) ->get();
