SimpleSetup Builder Free [Mac/Win]

Simplified creation of installation packages using predefined macros. You can use these macros for any program installation. Installation packages created using KEYMACRO are in a.reg file format and can be executed using a command-line interface (CLI). SimpleSetup Builder is a very easy-to-use application that facilitates a user-friendly interface for compiling files into installation packages (.exe format), in order to seamlessly distribute software programs and any types of files. It comes packed with several practical options that can be easily tackled, even by those less experienced with such tools. Simple installer and interface Installing this app takes minimal time and effort, as there are no special options, mandatory software products, or third-party components bundled with the setup kit. As far as the interface is concerned, SimpleSetup Builder opts for a normal window with a plain and simple structure, where you can use the built-in file browser to locate and add as many files as you want to the destination list for packaging, while keeping in mind that the number and size of items affects the size of the resulted.exe setup object. Add files to create setup packages It's possible to indicate the target folder and enable an autorun menu, enter the title of the new setup file, reduce its size, as well as edit its information. The new installation file is created with the click of a button in.exe format. Afterward, you can launch it to inspect results. There are no other notable settings provided by this tool. Evaluation and conclusion The program had a good response time to commands and didn't put a strain on the computer's performance in our testing, since it needed a low amount of CPU and RAM to work properly. It remained stable throughout our evaluation, without triggering the operating system to hang, crash or show errors. A brief help file is available for less skilled users. On the other hand, it failed to create setup files on a couple of occasions, although no issues were mentioned in this regard. We are also taking into account that SimpleSetup Builder hasn't received updates for a long time. Unfortunately, it doesn't seem to be in development anymore. If you want to download a simple application that will let you back up your favorite programs and even create your own backup folder, do not hesitate to download this software from Softonic. You can install the app on your operating system and start using it immediately. This software will help you restore everything from your computer without having to lose 77a5ca646e

This multi-purpose application is an advanced tool for installing Windows programs and setup files. For those who are not familiar with the process of packaging and distributing software programs, the included Wizard application makes the process easier, as it guides users step-by-step through the process. The application allows you to easily access the functions for creating Windows setup packages, which you can easily launch to install software and files on a PC. Another cool feature of this application is its "Start Menu On Screen" option. You can choose whether to enable this option and have an on-screen menu list on the Windows desktop. This program includes a smart Wizard, which allows you to create and manage multiple install files. Evaluation and conclusion The setup builder offered a good selection of tools to help you create professional-quality packages. The Wizard has a customizable and clear interface, which makes it user-friendly and easy to use. You can easily create custom installers with this program. Additionally, you can manage and organize your files, package them, and create new installers. In the end, SimpleSetup Builder has got all the necessary tools to create professional-grade setup packages. It's a program that can help you create professional-grade installers. Description: This software tool is a flexible package manager for Windows. It helps you create professional-grade software installers and easy-to-use software distribution systems. Version 2.1 is a minor release. The major change is a few new features and some bugfixes. New features 1. New feature: You can now, through a "Shortcut" button on the "Add a New Software Package" wizard, create a new package with shortcut files. This means that there is no need to add shortcuts to the computer each time you create a package. 2. New feature: If you install packages from the web-based portal, and you install the wizard, the wizard will automatically close and you won't have to open the wizard again. 3. New feature: You can now, through a "Get Shortcut to this wizard" button on the "Start menu entry" wizard, get a shortcut to the wizard. 4. New feature: You can now, through a "Browse" button on the "Start menu entry" wizard, get a list of all the programs in the "Start menu". 5. New feature: You can now, through a "Browse" button on the "Programs

What's New In SimpleSetup Builder?

This handy software application allows a user to make custom-made packages that contain different files, including EXE or installable software, media files, other application components, installation or setup packages, add-ons, etc. Product Features Easy to use User-friendly interface Create standard setup packages with several options Evaluation and conclusion Liked: It is quite easy to get started with this tool It is also packed with lots of useful features Compared to other similar software products, this program remains cheap Didn't like: It is not in development anymore Summary Excellent SimpleSetup Builder is a handy software application that makes it easy to create setup packages from various files and other application components. It comes packed with several practical options that can be easily tackled, even by those less experienced with such tools. Simple installer and interface Installing this app takes minimal time and effort, as there are no special options, mandatory software products, or third-party components bundled with the setup kit. As far as the interface is concerned, SimpleSetup Builder opts for a normal window with a plain and simple structure, where you can use the built-in file browser to locate and add as many files as you want to the destination list for packaging, while keeping in mind that the number and size of items affects the size of the resulted.exe setup object.
