June 16, 2017 - Trainer Name: V1.4.0 Trainer +22  
Platform: Steam Version: V.1.4.0 Non-working features:  
Fast Recruiting (default F11) and Fast Construction. The  
video shows how to install it. As with other trainers, this  
one has its pros and cons. But it definitely works. The  
video shows the training mode. When you enter this  
mode, a window appears with the inscription "Trainer  
activated". In this workout mode, you do not need to  
press anything. If everything is done correctly, the trainer  
will be activated and the time on the timer will burn out  
automatically. You don't need a trainer to play. Just run  
the trainer, and it will automatically activate everything  
you need.
