While many people are thinking of their rights to share the works that they create for others (a right that has been eroded over the last few years) it would be well to remember that there are people who exploit the internet in ways that are beyond the rights of a simple citizen. A website called HostShutdown warns the public of a somewhat new breed of criminals called 'Distributors' who are posting illegal copies of software (this includes games) for sale on the internet. These guys do not actually purchase software from the companies that produce them, they only use pirated copies of the game and upload them to the internet for sale. Because they have no affiliation with the company that created the game they do not have to pay the licensing fee to that company. While the gamers who buy the game are on the hook for the full retail price of the game, the Distributors get their games for free and they are making a profit from the sale of the games by exploiting the lower cost of production that is a product of piracy. It is important to remember that when you purchase a game, CD or DVD from a store, you are paying full price for the software that has been produced. The distributors are exploiting the companies that produce the games to make money off of them and are in effect, stealing from the companies. It is not the fact that the distributors are taking a product from
