All versions of AutoCAD include the following primary tools: 2D drawing 3D modeling data entry graphics preparation image editing 2D drawing 2D drawings created with AutoCAD are stored in a project file on the computer's hard drive. Project files are analogous to a film project folder in photo editing applications. In AutoCAD, project files are contained in one of the following types of folders: The drawing file contains a drawing with associated images. If a drawing requires text, dimensions, or annotations, additional data files are included in the drawing file. The.DWG file extension is used for AutoCAD drawings. If a drawing contains dimensions, notes, and comments, the accompanying data file is a.DTA file. It is also common to have a.DAT file for 2D CAD drawings. AutoCAD does not support PDF-based drawings. For more information on PDF files, see the "PDF" chapter. 3D modeling AutoCAD is used to create 3D designs, models, and drawings. A 3D modeling session begins when a new drawing is opened or an existing drawing is opened for editing. A session includes a number of tools that allow the operator to create geometry and layout. All drawings can be categorized as 3D, 2D, or 2.5D. 2.5D drawings are representations of 2D or 3D objects but do not contain the full 3D capabilities of AutoCAD. 3D drawings have a.3D file extension. 3D drawings may be created from 2D drawings with the use of the Stretch and Copy tools or by copying and pasting 2D drawings into the drawing canvas. If 2D drawings are exported and imported into AutoCAD as a 3D drawing, they retain their original.DWG file extension. If an existing drawing is imported as a 3D drawing, the.DWG file is automatically converted into a.dwg3 file. 2D CAD drawings have a.DWG file extension, except for 2.5D drawings, which have a.3D file extension. 3D drawings created from 2D drawings retain the.DWG file extension. Data entry Data entry is the process of creating information into a drawing. When information is entered into a 2D drawing,

While he lies comatose in the hospital, a witness comes forward and gives a chilling account of the events leading up to the assault. As Mills becomes increasingly obsessed with finding the man responsible, his life starts to disintegrate. As his world is falling apart, the man responsible for the assault and Mills' current obsession approaches him on the subway, and there is only one way out.Feline immunodeficiency virus infection: an emerging threat to cats and to public health. Feline immunodeficiency virus (FIV) is a retrovirus that can infect domestic cats. Although the disease has been reported in all US states, it is most commonly found in the southeastern United States. Cats asymptomatic for FIV can serve as sources of infection for other cats and humans. In

addition, FIV is being increasingly recognized as an important pathogen in cats with chronic immunosuppression. Subclinical infection with FIV in domestic cats and with FIV infection in other species can result in severe, potentially fatal, immunosuppression.1.
