What's New In Gregion?

Record and convert your games in the best possible quality. Gregion is a free screen recording tool designed to help you record your games and produce output files in a wide variety of formats. You can create movies in formats as different as Real Media (RM) or AVI, and both MPG and MP4 as the video output format. Available file types are: RealMedia, WMV, AVI, MPG and MP4. You can decide the video output format you prefer from different options. The bitrates you can chose to use to encode the recordings range from 8 to 40 Mbps. The quality of the resulting files is adjustable through video encoding packages, the file size and the frame rate. As many other recording tools, Gregion can be controlled directly from the game itself. Features of Gregion: - Record in real time (FPS 100 or 60). - Record your games on your operating system, or store it in the form of video files. - Recording to RM, WMV, RealMedia and more. - Windows 95/98/NT/ME/2000/XP/2003. - Compatible with all DirectX-compatible games. - Recording is not time limited. - Support for screen capture software. - Record audio in the form of WAV files. - Support for Winamp, Windows Media Player and more. - In case you are using a DirectX-compatible game, you will be able to overlay some captured images with graphic logos in the output file. - Watermarks. - Font types. - Effects: Invert, grayscale, outline. - Custom capture time limit. - Custom capture duration. - Custom capture height. - Custom capture width. - Save recods as text documents. - Save recods as separate audio and video files. - You can convert your videos to other formats through a self-explanatory menu. - New settings can be saved and automatically applied on subsequent conversions. - RealMedia encoding available. - Able to record audio in a wide variety of codecs. - Able to record any sound device that is compatible with your system. - Use filters in the output video. - Real video editing. - Customize the startup sound. - Two powerful recording modes available. - Preview feature allows you to see the scene that will be captured directly on the screen. - Hardware acceleration. - In the live
