Google said the Project Ara smartphone initiative is an "open source approach" to building smartphones, which it described as a way to "build products that are uniquely useful for the billions of people in the world who do not have the resources to build a phone." Ara, however, is mainly aimed at developing markets such as the developing world and emerging markets in the Asia-Pacific region. Project Ara will be able to function on a GSM radio and connect to the internet. The device will be "embedded" with antennas, connectors and other parts that make up the hardware of the phone. Ara can be customized with modules from a variety of sources, including the Project Ara website. Here's how it works: Modules will be "commoditized and sold by their vendors," Google said, but users will be able to customize the modules and have them added on or removed from the phone after purchase. Ara has users take photos and send them to the computer over 3G or Wi-Fi. The computer then translates the photo, reconstructing a 3D model of the surroundings. The model can be shared with a collaboration of Ara users. Users can then walk around the virtual model and navigate using a VR headset. Google said it has received funding to start work on Ara from its Google X lab, specifically from the "Google Lunar X Prize." The project is a multiyear contest that gives \$30 million in prize money to the first privately financed team that can land a rover on the moon. On May 19, Google revealed that it had already entered the competition as a team that is not directly affiliated with Google X. In December, Google revealed that it has hired Bob Vila, a noted home renovation expert, to help with its Project Ara effort. Vila will "be advising [the] project on the supply chain, manufacturing, and mechanical aspects of the system," Google said.'ve seen in these last few years. Even with some stacked pitching, this is a club on the verge of change. That's a big bet to make. And if you do, I hope you're willing to absorb the eventual consequences. This is a club with a clear identity problem. A team that plays the game the right way, but is stuck on a roster that doesn't. A club that is ready for a new beginning. We'll see. But for now, based on what we'

't even clean up after their own dogs, and it's totally OK!" One scene a bit later had a gleeful Tywin remarking about the pleasure one gets from eating Dornish food ("the Dothraki, for all their savagery, are still men who know how to taste a good pear") and Ser Arthur Dayne, in all his bearded glory and wavy hair, had Tywin say, "You look like an outhouse!" The dragon's presence was key to this episode, and its presence was almost entirely forgettable. There are dragons, and then there are dragons. When a dragon dies and comes back to life, that's a meaningful moment. When dragons get sentient, turn on their masters, and devour a Hand of the King, that's a pointless moment. (This is what's called a foreshadow.) Aside from an enjoyable brothel scene featuring a dragon, there was one other good moment when Cersei was speaking to her new Hand of the King, Artos, and she asked him how much the Lannisters were paying him: "Not much." Cersei clapped a hand to her chest. "Oh, you've given me a marvelous idea." She took a step to the side, signaling for Pycelle to remain quiet, and whispered, "That old witch. She'll be expecting much more, won't she?" That's when I realized: Qyburn is going to do this to Cersei. Every time she becomes annoyed or upset with him, he's going to convince her that someone or something she's dead set against is worth something. It's the height of the foreshadowing, but it feels like a very fun twist. In the battle, Jaime managed to take down three White Walkers, leaving only the three mounted on the walker and robed in white. A brilliant bit of casting: Lena Headey is playing this big character, and she's staring into the distance, her face expressionless and gray, as she rises atop the giant serpentlike creature. Even before the quick change, she was playing a strong, silent type of character, something that often goes overlooked in Game of Thrones episodes. This eer
