Video Sanctuary Product Key Full [Updated]

[Download](#)

Video Sanctuary is a video encryption software which will help you protect your video from unauthorized distribution. With this tool, you can encrypt various types of video or audio files (e.g., mpeg, mpg,wmv,avi,.mov,mp4,.vob,mp3, wav,.au,midi,wma,asf,aiff and other media files). You can encrypt video or audio file using this software with password, this will produce an exe file and users can only play the encrypted media files after obtaining the Play Password provided by you. When a user tries to play that video, Exe will ask the

playback Password to play that video, this password is unique for every machine, this also will generate a Unique ID for that Machine. When a user wants to play an encrypted file, the encrypted file will pop up a dialog box to request the user to enter a Play Password. This dialog box will display the machine ID of the user's computer. The user can send his/her own machine ID to you, and you can create a Play Password based on the user's machine ID. After that the user can use this Play Password to play your file on his/her computer. This will protect redistribution of video file. Video Sanctuary is a video
