i350Å . Check the printer for paper jammed in the paper tray or in the. You should reset the ink absorber counters after every usage.Â . Canon ij is adding a brand new service mode called smart.10.7554/eLife.20375.016](10.7554/eLife.20375.016) Chromosomal aberrations are under control of DNA damage checkpoint components (DDCs) {#s4-2} -----

----- During DNA replication, the PCNA protein is a non-enzymatic client of checkpoint kinases and is thought to regulate the assembly of pre-replication complexes ([@bib32]; [@bib39]). In vertebrates, it has been suggested that the unattached PCNA has a higher affinity for the Fanconi anemia (FA) core proteins CFP-1 and FANCP (ATR in *Drosophila*) ([@bib44]; [@bib46]; [@bib66]). In the absence of DDCs, PCNA forms abnormal foci that trap DNA-associated proteins. This leads to the activation of the

homologous recombination repair pathway (HRR), and can lead to DNA damage-induced chromosome instability ([@bib44]; [@bib66]). This was also observed
