Springer Nature, 2016 - Based on the best-selling textbook by the award-winning authors of the journal, "Essential Numerical Methods" and "Textbook of Statistics and Finance." This thoroughly updated fourth edition features: a new structure that has been customized to meet the demands of the new exam, an expanded and in-depth coverage of recent results, an emphasis on modeling, concepts, and applications, an updated reference section, a more extensive discussion of Monte Carlo methods and applications, new sections on lognormal and mixtures of distributions, partial differential equations, Stochastic models, and Simulation. The authors have revised their

unsurpassed new edition to provide optimal coverage of the most recent advances in statistics and are accompanied by new instructors, with original content by top authors from the best known academic journals. New to the fourth edition: Cover all the basics of sampling and simulation with a new emphasis on Matlab and. The book is also available for the AP computer science test, but it is not intended to replace the textbook. This book is intended to complement the text by providing supplementary material that cannot be found elsewhere. Other supplementary materials are also available online. The book was written for students who wish to learn pure mathematics. It is not a standardized test preparation book. Table of Contents Foreword I. Introduction II. A compact introduction to discrete random variables III. A compact introduction to continuous random variables IV. Sampling with replacement V. Monte Carlo estimation VI. Simulating Poisson, Negative Binomial, and
