I have an asp.net server side code and a JavaScript in a separate page. Is it possible to create a JavaScript reference to it? Basically I have a code block that saves a value in a form and another page that has a JavaScript that has that value that I need to refer to. From what I have read that is not possible but I have seen an example that did something similar. Here is the code: Server side code: protected void Page Load(object sender, EventArgs e) { string UserName = ""; if (Page.UserName!= null) { UserName = Page.UserName.Replace(" ", ""); } //Ejecutable1.SaveLambda(UserName); string UserId = string.Empty; if (Int32.TryParse(Request.Form["email"], out UserId)) { Lambda1.Save(Page.UserId, UserId); } else { if (UserName!= "") Lambda1.Save(UserName, UserId); } } And the JavaScript code: function save() { if (document.getElementById(' EVENTTARGET').value!= null) {
