Little Bob Dog is a brand new endearing adventure game with playful and often funny aspects. Little Bob Dog was originally designed and made by me, the developer. Throughout its development, my goal was to make a game for both children and adults. This game is about risk, fun and discovery.

The look and feel are playful and casual. You can jump over all things but you have to get Bob to jump. I often give my game away for free but I also sell physical copies. You can see my game list on the contact page. Feel free to contact me if you need further details, games I sell or anything else.

Do you like animals? You will like Little Bob Dog, it's true! What the ****!? How can you expect an indie game to be 100% awesome from the get-go? Whenever I see posts about indie games that show off screenshots with 20,000,000,000,000 stars, i get pissed off. The number of stars don't indicate whether or not a game is worth downloading, there's no way to know for sure by just glancing at a small screenshot. They might be indie games, with many unknown developers, who don't even have a decent budget, nor don't know how to make a game. Stop pretending. Now, im not going to go so far as to say that indie games should be treated like nuclear launch codes. but i do think that we should be a bit more discerning about how/when we give press lines about them. When I'm approached about a review, I'm more than happy to do so. I would absolutely love to get to play an indie game that im not familiar with, and review it, just as I would love to write about a AAA

game if im not already familiar with it. I'm not claiming to be impartial, just not at all. I will (hopefully) be pleasantly surprised by the beauty of the game, the art, the music, but I'll be honest about my expectations. This has nothing to do with flashing numbers, or anything to do with the original topic. But it seems to me that every time I see a review of an indie game, I can tell from the first few sentences that the reviewer was invested in the game, or played it extensively. To me, this screams unprofessionalism, with no regard to who the game is c9d1549cdd
