“The way we capture the movements of the players in motion is so accurate that the result is almost like being there with the player and watching them do the motions,” said David Rutter, one of the game's lead creators. “This revolutionary technology allows us to create an incredibly high level of realism in all aspects of the game.” This new technology will enable players to run, jump, tackle and pass the ball more fluidly and efficiently, and is further refined through game physics, artificial intelligence and match flow that reward players' actions. A number of graphics and gameplay innovations are also included to enhance the in-game experience, including:

- Physically Based Shading** : With this new look, shadows more accurately react to objects that are closest to the player and new global lighting ensures a more convincing look.
- Dynamic Cast Shadows** : Using the game's physics engine, the physics of the objects within the game allows for dynamic shadows and how they react to changes in player movements and camera angles.
- Player Trajectories** : Human players can make sudden changes to their run and movement, making it easy for opponents to predict their next move.
- Physically-based Player Control System** : A new physics-based player control system that supports agile dribbling and passing with more realistic ball possession.
- Player Recruitment** : Updated player recruitment based on your game settings, including new movements, improved intelligence and player ratings.
- Enhanced Ball Physics** : Player run, jump, pass, and tackle the ball more realistically, making each ball action feel more believable.
- NFL Player Contract Model**: Player contract values, salaries and marketability are now taken into account when negotiating player transfer requests.

Features Key:

- **Future Player** - Introducing the highly anticipated new feature “Unlocked Future Player”, which delivers the power to unlock all the World stars of the future with new U9s who have yet to play FIFA!
- **National Teams** - Easily join any of the participating National Teams from around the world, and practise with your selection of your favourite National Team players in the AI controlled International Friendly challenges.
- **Complete Career** - Follow the path of any top professional player, now and in the future with a highly-personalised career model. Set up your own academy, take charge of your team or manage a team in the lower divisions, as you rise up the pros through seven leagues to compete against the best.
- **Free kicks and dribbles** - Improve your free kicks and dribbles from a new perspective with the new Kick Wizard feature that enables you to kick and manipulate the ball in multiple ways.
- **First Touch Engine** - FIFA 22 uses revolutionary First Touch technology, based on the final touches players make as they control the ball. The First Touch Engine introduces a new physics engine, making the most of the gestures of your player to move the ball with action, clarity and accuracy. It will make passing and shooting even more realistic, finishing with razor sharp precision.
- **Visual Experience** - FIFA is more than a football game, it's a 3D playground. With enhanced FMV, crowd simulation and completely new environments, FIFA makes it even more enjoyable to take charge of matches on any pitch, including virtual reality.
- **New broadcast networks** that connect fans with FIFA with or without the TV - The new Open Broadcast Network lets you dive right into FIFA action and take ownership of matches or competitions. It offers enhanced artificial intelligence, visual and audio enhancements, iconic shots, and complete integration into the game in order to create the best viewing experience in football. Plus you will be able to stream matches live from the BBC, NBC and many other networks, as well as real leagues and cups from around the world.
- **Soccer Ball Physics** - FIFA Soccer is the game defined by its ball control. We've worked in every single detail to ensure that it handles as intuitively as possible: first touch, power dribbling, chipping and shooting all feels just right, and the ball moves with complete
