I have gone over a few of them and I have created a reference tutorial on how to use Autodesk Exchange Apps. You can read the full tutorial at: In the tutorial, I explained how to use API for drawing and import/export to PDF and SWF (Flash file). However, the "official" list of API is missing a few. So I did a little research and came up with a "not so official" list of API. This is in no particular order. Here is my list: Here is a tutorial on using the API: Here is a full reference for the topic: You can also read about other Autocad APIs at: When using the API, most of the time, there are pre-built libraries available, but some require using custom assemblies. The file is already ready for you to use. You just need to copy and paste, and edit as required. You can read about these pre-built libraries at: af5dca3d97
