Monostable - The Up and Down Control In this scenario, the rolling switch, known as a reset toggle, is set at the same time as the end stop (ie. switch on the side that the roller is on), and the job of the roller is to move the handwheel until the switch is pressed. If the switch is pressed while the roller is in motion, the job of the roller is to move the handwheel until it reaches a stop, and the switch will be released. Since this scenario is similar to that of the start/end, this system is typically referred to as end/start. While the mechanism of the end/start 6d1f23a050
